# Soprano Ice Laser Hair Removal

The old fashioned ways of removing hair - shaving, tweezing, creams and waxing are time consuming and are a temporary measure.

Now you can obtain long lasting results with the Soprano ICE Laser System which offers virtually painless hair removal due to its revolutionary cooling system. The system works by gradually heating the skins dermal layers to the temperature required to damage the hair follicles and prevent regrowth. The hair follicle is damaged by targeting the pigmentation (melanin), which absorbs the light of the laser.

On average 8 treatments at 4-6 week intervals are required to treat any one area.

All Laser treatments require a patch test prior to treatment which costs £20.00

Laser packages available.

# Focus Dual

Focus Dual offers a unique combination of two of the latest clinically proven technologies for non-surgical skin tightening of the face and body. Radiofrequency Microneedling (RFM) and High Intensity Focused Ultrasound (HIFU) combine in Focus Dual to give medical-grade performance and proven clinical results, with little to no downtime and minimal discomfort.

## Focus Dual - RFM - RADIOFREQUENCY MICRONEEDLING

### What is Radiofrequency Microneedling?

Ultrafine needles gently penetrate the skin to different depths, where they release radiofrequency energy. This heats the skin and stimulates a healing response within the body leading to the production of new collagen and elastin, as well as an increase in cell turnover. This gives you tighter, more supple skin while also reducing fine lines and improving scarring and stretch marks.

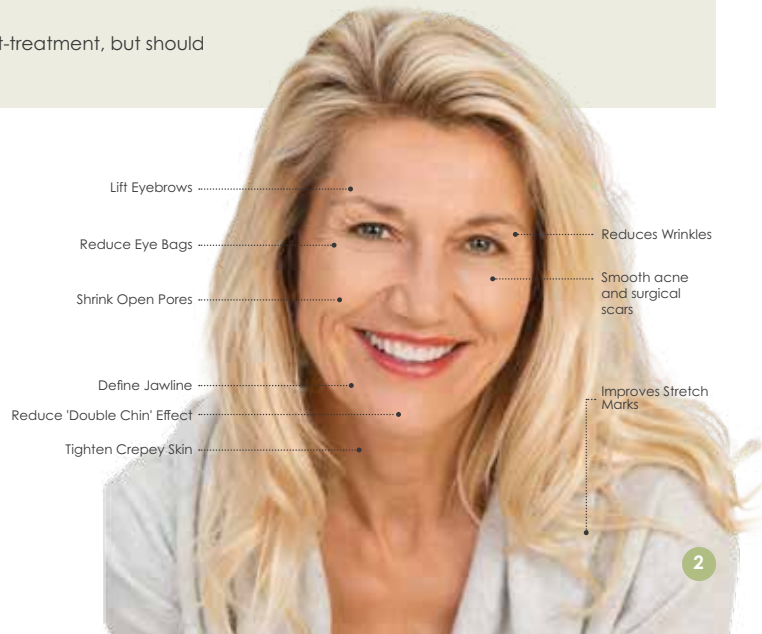

### How many sessions will I need?

Results can be seen after one session. However, a minimum of 2 and up to 6 treatments, at 4 week intervals, deliver the best results, depending on the skin concern.

### Will there be downtime?

There is virtually no downtime. A slight swelling and redness are present immediately post-treatment, but should subside quickly.

# Focus Dual - HIGH INTENSITY FOCUS ULTRASOUND (HIFU)

FOCUS DUAL

High Intensity Focused Ultrasound (HIFU) is a non-surgical treatment that uses ultrasound to lift, firm and tighten the skin.

HIFU deposits focused ultrasound energy below the surface of the skin, contracting all skin layers in just one treatment! This stimulates the creation of new collagen in the area. HIFU is highly effective in firming, tightening and lifting the facial skin and reducing excess skin on the body.

## How does the treatment work?

This non-surgical face lift works on the SMAS layer deep below the skin, which is the area surgeons tighten for face and neck lifts. Rather than surgery, the Focus Dual harnesses ultrasound technology to radiate energy to the SMAS layer to tighten, lift and plump the skin.

## How many sessions will I need?

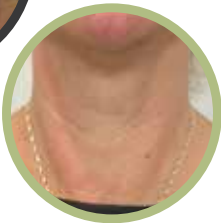

Treatments are carried out every 6 weeks and typically between 1 and 3 treatments are recommended for best results. Top-up sessions are performed as required, but usually only once or twice a year.

## How long will it take for me to see results?

Results can usually be seen immediately, but the results get better and better up to 12 weeks post treatment as your collagen is renewed.

## Skin Tightening

Laser skin tightening is a non-invasive procedure that helps to smooth and tighten lines and wrinkles caused by aging and sun damage. The treatment helps to stimulate the production of collagen and new skin cells, creating a tighter, brighter and more youthful appearance.

### How it Works

Laser skin tightening works by using a safe and targeted near infrared light (NIR). We use the Alma Lasers NIR which safely and effectively heats the dermis (inner layers of skin), stimulating the production of collagen. The treatment helps to tighten the skin, protecting it against future aging. A healthy layer of collagen in the dermis will help to provide skin with the elasticity and resilience that it needs, preventing sagging and keeping skin tight and smooth.

Laser skin tightening differs to laser skin resurfacing in that the laser does not affect the top layer of skin. Instead, the laser penetrates deep within the skin, stimulating new cell growth and collagen production from within.

### Treatment Areas

Laser skin tightening can be used on a wide range of areas. The most common issues that we treat include:

- Sun damage
- Fine lines and wrinkles
- Forehead
- Bags underneath the eyes
- Loose jowls and sagging skin around the neck
- Lines from the nose to mouth

## Hollywood Lift

ClearLift™

The Hollywood Lift, also known as Harmony Clearlift, has a wealth of famous celebs using this and why? because it is a laser that penetrates the skin's dermis by 3mm, resulting in a refreshed, lifted and tighter complexion.

It is the world's first fractional non-ablative 1064nm laser, meaning it works by heating up the chosen skin tissue without actually destroying it, but instead it stimulates collagen production for rejuvenation and is painless.

The Hollywood Lift targets, age spots, fine lines and wrinkles, jowls, neckbands and sun damage.

Results are noticeable straight away!!! Boosting your self-esteem and confidence as you appear younger.

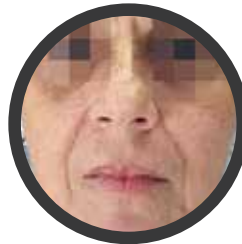

A course of 6 treatments is recommended having one every two weeks.

## Harmony XL PRO ClearSkin

*Spectrum of Solutions*

While there are many treatment options available for acne, both prescription and over-the-counter, these do not always work for everyone. When acne is particularly stubborn or severe, a more advanced solution may be needed.

Harmony's acne laser treatment uses a combination of laser technology, simultaneous contact cooling for more comfortable treatment and a unique vacuum mechanism to treat all forms of acne vulgaris. The treatment is suitable for all skin types, has no side effects and achieves a clearer, smoother complexion with lasting results.

<b>Chin</b>	<b>£50</b>	<b>Cheeks</b>	<b>£75</b>	<b>Forehead</b>	<b>£65</b>

## Nail Fungus Removal

Nail fungus is a difficult-to-treat fungal infection of the fingers or toe nails. With traditional treatments such as medications and topical creams showing only limited success, Harmony opens up new possibilities with a section of clinically proven laser and light-based solutions. Harmony's breakthrough treatments target the source of the infection beneath the nail plate, clearing nail fungus.

## Red Vein Removal

An advanced non-invasive treatment to clear thread, spider, facial and broken veins. Using advanced light, laser and Advanced Fluorescence Technology (AFT), Harmony targets the affected blood vessels beneath the skin, eliminating these unsightly blemishes, giving you clear skin and renewed confidence. The treatments are safe and effective and provide reliable, long term results.

## Pigmentation Removal

Lifecycle and hormonal changes can effect the distribution of colour (melanin) in our skin, leading to the appearance of sun spots and age spots.

Harmony's light-based and laser treatments remove the appearance of spots and pigmentation by targeting the melanin in the darkened area, clearing all layers of the pigmentation and revealing even-toned, unblemished skin. The treatments are safe and effective for all skin types.

## I-Lipo

The Intelligent alternative to liposuction. I-lipo is the latest lipolysis, offering you a way to achieve inch loss and body contouring with no pain, no needles and no down time. A course of 8 treatments is recommended per body area. These treatments should be taken twice a week at regular intervals.

<b>I-Lipo</b>	<b>£75</b>
<b>I-Lipo course of 8 treatments</b>	<b>£500</b>
<b>I-Lipo with CACI Toning</b>	<b>£125</b>
<b>I-Lipo with CACI Body Toning of 8 treatments</b>	<b>£960</b>

### How does I-lipo work?

The I-lipo uses a low level of visible red laser light to stimulate the body's natural processes that empty the stored fat contents inside fat cells.

The laser light gently absorbs into the individual fat cells in the treatment area, temporarily opening pores in the cell wall through which the cell contents can escape. This does not affect the neighbouring structures such as skin, blood vessels and peripheral nerves. The contents of the cell are collected by the lymphatic system and transported to areas of the body where they can be metabolised into energy during exercise. This metabolism of the cell contents permanently removes from the body leaving smaller fat cells and giving you inch loss.

### How does CACI Body Toning work?

The CACI Body Toning individually targets specific problem areas like, bottom, stomach and legs. Using a microcurrent this allows the muscles to be toned seeing inch loss. This treatment work's extremely well with I-Lipo, using the combination of breaking down the fat in the body and toning at the same time.

## Cosmetic Treatments

Dawn Jasper is a Harley Street trained Aesthetic nurse with 20 years of experience. She has been trained by Dr Jan Stanek, so you know you are in safe hands. She specialises in Botox, Dermal Fillers, Sclerotherapy, EDS, Nano Plasma and Sculptura. All her consultations are completely private and free of charge.

Dawn prides herself in her aesthetics work and always promotes the 'natural' look and would happily advise a client when to stop, if need be, as the clients long term well-being is her main priority. These treatments are carried out by an External Professional Nurse who is insured by her own specialists. All prices are quoted on consultations.

### Botox

Botox treatment works by blocking the nerve signals to the affected muscles around the injection site. The muscles then become more relaxed, reducing the effects on the skin such as lines and wrinkles. Botox can also help with excessive sweating and migraines.

1 Area **£185** | 2 Areas **£245** | 3 Areas **£300**

### Profilo

*Profilo A unique hyaluronic acid injectable gel, which stimulates the skin cell receptors to counteract skin laxity and improve and restore firmness. While boosting and hydrating the skin, it also remodels ageing and sagging areas too. Common treatment areas include the face and neck, but can also be used for the décolletage, hands, arms, knees and abdomen area to effectively treat skin laxity.*

Treatment after consultation **£250-£325**

### Sculptra

Sculptra is an advanced product that lasts approximately 2 years. It stimulates your own natural collagen growth to correct shallow to deep facial wrinkles/folds, including smile lines.

2 vials **£800**

Please note that the solution is made up 1 week before treatment, therefore a 50% non-refundable deposit is required.

### Thread Veins

This treatment requires an injection of medical solution into the vein that results in microscopic damage to the cells, causing the vein to close, then disperse.

2 ml Solution **£80** | 8 ml Solution **£200** | Follow up **£150**

Average 2-4 treatments, should be 6 weeks apart.

### Nano Plasma

This treatment is a non-invasive, reliable and safe procedure performed with a nano plasma – formed through ionisation of atmospheric gases to stimulate instant contraction and tightening of loose skin.

Non-Surgical Blepharoplasty (removal of upper/lower eye bags) **£600**  
(price is for 3 treatments, 6 weeks apart)

Acne (active/scarring) **£150-£200**

Age Spots/Milia/Scars prices from **£150**

(Consultation required prior to treatment)

**Please Note:** Chic Face and Body Clinic do not have any control over the outcome with treatments carried out by myself, Dawn Jasper.

## The CACI Electro Cellulite Massager (ECM)

Cellulite is the term used to describe pockets of fat which are trapped and cause dimpling in the skin. This lumpy dimpling is irregular and patchy and is often compared to the appearance of orange peel or cottage cheese.

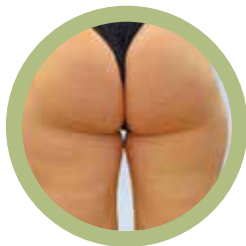

To treat cellulite it is necessary to stimulate the area in order to reduce the volume of fat that has become stored and to kick start the blood flow and circulation which has become sluggish. Let us tell you what degree of cellulite you have via a x-ray and design a treatment plan for you.

## Electrolysis

Electrolysis is still currently the only FDA approved treatment for permanent hair removal. Sterile gloves, tweezers and disposable needles are used with the highest hygiene standards. Electrolysis destroys the hair follicle on contact, preventing any further growth. The treatment course can be lengthy, but with time, hair growth is slowed and with repeated procedures, can cease entirely.

## Hopi Ear Candling

Ear candles have a purely physical function. A light suction action (chimney effect) and the movement of the flame induce a feeling of warmth and a balance of pressure in the ears. It is soothing and helpful for earache, headache, ear noises, stress, nervousness, and no more blocked ears when flying.
